

Beach Access

Building 9 is the closest in Midnight Cove II to the beach. The beach is public but access is private and you are given a code to get through the gates.

From the building entrance, cross the parking and exit through the path between the blocks of covered parking. Turn left and activate the pedestrian crossing lights. Cross the road when traffic stops, take five steps to the right and then turn left and take the path which leads straight to the beach between the Midnight Cove 1 and Siesta Royale properties. There is one coded gate right at the beginning of the path. Follow the path past the Midnight Cove 1 parking area. At the end there is a shower and hose available for washing off the sand when you return. Take the wooden walkway up to the second gate which is operated with the same code. Continue over the dunes and down onto the beach.

You can take chairs and umbrellas from the apartment in the cart provided or rent cabana beach loungers from <http://www.beachcabanaboys.com/> . Call them on 941-284-9666

This is one of the best beaches in the world with a fine white sand that remains cool to bare feet even on the hottest days. The beach is very safe for children since it slopes out very gently and the water is mostly very calm. Do take and use plenty of sun cream.
